

## **DIAGNOSIS RANKED BY TOTAL PAID REPORT**

### **What is captured in this report?**

The Diagnosis Ranked by Total Paid report presents all claims in the specified date range by diagnostic category ranked in descending order. The report further breaks down each diagnosis by the total number of claims (and of those claims the total number of unique claimants) and inpatient versus outpatient utilization.

### **Why run this report?**

This report is designed to assist the user in understanding costs to the health plan associated with specific diagnostic categories. It may help the user by identifying common or high cost disease categories. This can be used to assess the need for employee assistance programs such as disease management, at work exercise programs and other pro-active approaches to assisting employees in personal health management. It also can be used to assess the effectiveness of various wellness initiatives. This report can be created for multiple periods of time for comparative analysis.

### **What are the required data parameters?**

Users must select incurred and paid date ranges and must indicate the number of diagnosis categories to appear on the report. Users have the option to select a list of 25, 50, 100, 200, 500, or 1,000 categories.

### **What time periods are available?**

The data is refreshed nightly and is available as far back as 36 months from the current month.

### **Glossary of Terms**

For a complete glossary of terms, please see the Getting Started Guide.
